Sprouting Supplies

Here are a few items that will make your sprouting efforts easier and more productive. Enjoy!

Geo Sprouter

The Geo Sprouter is a clean and efficient way to grow your sprouts right at home! Enjoy fresh from the sprouter taste and the maximum benefits of the nutrients sprouts offer--which is the whole point of eating sprouts! Bavicchi's Geo Sprouter is designed with 3 growing levels, each subdivided into 4 sections, allowing you to mix and match a wide variety of sprouts.

The top three levels have narrow slots cut in to keep the seed in the tray, yet allow excess water to drain and enhance proper air flow.

Made from durable green tinted plastic that is attractive and easy to clean.

- Approx 9in tall & 8in diameter when assembled

Price: \$29.95

Terra Cotta Sprouter

Born from the art and expertise of Tuscan craftsmen, Terradisiena is the latest sprouter added to the GEO line. An innovative stacking system allows you to either space the trays individually to create a dark and damp environment, or allow air and light into the trays. Measures approximately 7 inches wide and 11 inches at full height. The natural terra cotta enhances maintenance of a moist environment for the seed, and the beautiful design looks great in any decor.

- Approx 11in tall and 7in wide when assembled

Price: \$49.95

Geo Sprouts For Health Book

This is a wonderful little handbook on growing sprouts, with descriptions and health benefits listed for most any sprout you may be interested in. Co-authored by Dario Bavicchi.

- 132 pages

Price: \$9.95
